

7-inches of user-friendliness

One simple user interface.
Control of a multitude of AV devices.

Good looking news for conference rooms and lecture halls.
Make life easier for presenters with one simple touch.

The Neets Touch Panel™ is a stunning 7-inch wall- or table-mounted touch panel enabling intuitive control of a multitude of AV equipment.

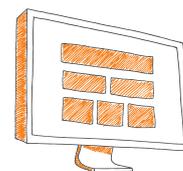

Our aim to unify all user interactions with AV equipment and room functions into an easy-to-use control lead to the creation of the Neets Touch Panel.

With Neets Touch Panel™ presenters can control the entire room from one place. The intuitive pre-designed user interface makes it easy to use all room functions. The GUI can be completely customized in Neets Project Designer, to meet customer needs and corporate design guides.

One gang back box - ready to use
Neets Touch Panel™ is powered through the ethernet cable (PoE), making installation both simple and with an absolute minimum of cabling. No extra holes or drilling in walls are necessary as the Neets Touch Panel fits directly into a one gang back box.

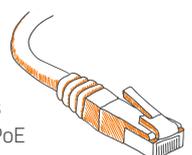

Provides users with touch panel control of a multitude of AV equipment

Use graphical templates or completely customize the GUI in Neets Project Designer

To ensure low power consumption and instant activation a proximity sensor detects presence nearby

For easy installation and less cabling Neets Touch Panel™ is powered with PoE
